

THE EAGLE'S NEST

MAY 2022

A MESSAGE FROM THE MANAGER

JOSH WEEKS

April was a much better month of weather than the previous months. It brought us our first tournament of the year, the Eagle Creek Traditional, as well as the start of our new Thursday night league. Even though we are not taking any more teams for Thursday night, I encourage you to join us for our Tuesday night fun scramble, more information on this within the newsletter. Keep in mind if you want to play on a Tuesday or Thursday evening, our league and fun scramble will take up 9 holes. We will always have 1 set of nine holes, either front or back, available for play. We do ask you to stay off the 9 holes the league or fun scramble is competing on.

This May the staff and I look forward to seeing you all as our weather continues to improve and the course continues to grow in and become beautiful. We will have our inaugural Member/Guest Tournament on May 7th. We are taking entries till 5:00pm Thursday May 5th. A course update I want to be sure to pass along is the addition of sand on the carts and sand on par 3's. This is a sand/seed mix to fill divots so the course can recover from use much better. Please use this mix whenever you take a divot on fairways and tee boxes. One final note for members. As the weather begins to get nicer, remember to visit our sister courses; Ironhorse, Piper Glen and U of I. You can play these tremendous courses being a member for just the cost of a cart.

A MESSAGE FROM GROUNDS MANAGER JONATHAN LUCE

A new addition this year is the sand bottles on the golf carts. It is very important to use the sand/seed mix to fill in your divots not only on the fairways but on the tees also. Why is it important, well there are two big reasons. The first being when you fill your divot with the sand/seed mix it will germinate and fill in where you just took the divot. The second reason is that when you take a divot and don't fill it in, that divot had pre-emergent in the soil. If it is not filled in then that is a spot in the fairway or tee that could start having crab grass growing there. These are the two big reasons to use sand/seed mix after you take a divot.

Eagle Creek
GOLF COURSE
